Welcome to

As many of you have noticed there have been lots of changes happening in and around HTS AmeriTek.

Just one of the changes is the way that you are being scheduled for work shifts.

By now you have all began to receive emails detailing what job assignments you may have coming in the days ahead. This is **Shiftboard**, the app is designed to schedule you for jobs, allow you to pick up extra work and possibly trade shifts with others if needed.

The main interaction that most of you will have with the application will be its *'clock in - clock out'* feature.

As of now we are still in the "learning/getting use to" stage, but in the not to distant future this will be how your onsite work time is logged and paid from. Resulting in no more having to send in timesheets or forgetting to send them in.

So, if you could please help us move forward and review the link below for setup details and use of **Shiftboard**.

And if you have any questions feel free to reach out to myself or Blake Dougherty, and we will gladly help as much as possible.

First, we're removing a tactical advantage the enemy has over our equipment during our summer offensive operations:

LEFT FLANK, REAR:

Second, we're installing new supply lines to our field power delivery systems. This new route will enhance deployment efficiency and reliability.
